

Project management geotechnics offshore wind power plants Planning and engineering office for structural and civil engineering offshore wi

Your Employer in Northern Germany

The employer is an established and leading engineering company in the field of engineering services for offshore wind energy projects for more than 50 years. The focus is on the calculation, planning and operation of foundation structures for offshore wind farms. With a dedicated team of experts, the office sets standards in the industry and contributes to sustainable solutions for offshore wind farms.

Your workplace as a project manager

The employer supports flexible working models and offers the option of a hybrid workplace. This enables specialists and managers to organise their working hours flexibly between the office and home office. The company offers a modern work culture, encourages independent work and offers the necessary flexibility to harmonise professional and personal commitments.

Tasks and Responsibilities

- Carrying out geotechnical investigations and assessments for offshore wind energy projects
- Planning and dimensioning of foundation structures taking into account geotechnical challenges
- Preparation of geotechnical reports, recommendations and studies
- Liaising with other specialist departments, including engineers, geologists and environmental experts, to develop holistic solutions
- Monitoring and evaluating the performance of foundation structures during operation

Education & Qualifications (m/f/d)

- University degree in geotechnics, structural engineering or geosciences
- Several years of professional experience in geotechnical planning and design for offshore wind energy projects
- Expertise in the use of geotechnical software and analysis tools
- Excellent knowledge of the relevant standards and directives
- Strong analytical and problem-solving skills
- Team spirit and strong communication skills
- German language required: B1/B2
- English language required: C1 minimum

Contract Offer

- Permanent position with AT contract
- Mobile working and home office days
- Company pension scheme and promotion of professional development
- An exciting and challenging job in an innovative working environment
- The opportunity to participate in pioneering offshore wind energy projects
- A motivated and committed team of experts

We're looking forward hearing from you. Interested?
